

# Green On Green

**Need:** Green Construction Paper, Green crayons, White tempera paint, Paintbrushes

**Directions:** Draw a design or picture on the green construction paper using green crayon. (This can get a bit tricky because its sometimes hard to see what it is you are drawing.) Just do some fun designs. Press hard with the crayon so its nice and thick. When the picture is drawn, brush some white tempera paint (not too thick) over the paper.

**Like magic, lines will appear from out of nowhere!**
